

Informatics Group is looking for developers.

Who do I escalate to if the contract becomes an issue? Escalate to Dana if necessary. Quicker that senior research leadership is aware, the better. Also Brian. Need John Cleveland to send an email to purchasing, with that you need Dana. Will give report at end of day, etc. Brian not really the right person. John Cleveland + Dana will say "this needs to happen or the money goes away."

"This is the last hurdle, we need to get this done."

Will be important to keep track of when things slow up. Virginia should piece together bill the gov't.

There's more reporting after the ordering deadline. 3 months after there is a status report, then yearly progress.
